

COSMIC

Innovation's mind

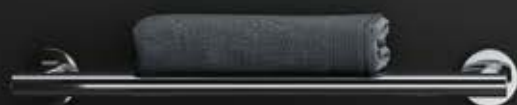

COSMIC

Architect

Design by **Cosmic Studio**

Go to the next level

Cosmic is proud to present **Architect S+**, a complete collection with over 25 different accessories designed to offer maximum functionality. This new proposal stands out for the brand-new, ultra-stable bracket system incorporated into many of the pieces. Architect S+ is safe, superior, sustainable and strong: four values close to Cosmic's heart. Because Cosmic is Innovation's Mind.

Cosmic presenta **Architect S+**, una completa colección con más de 25 accesorios diferentes pensados para ofrecer la máxima funcionalidad. La nueva propuesta destaca por incorporar en muchas de las piezas un sistema de soporte completamente nuevo, de una fijación absoluta. Architect S+ es segura, superior, sostenible y resolutiva, los cuatro valores insignia de Cosmic. Porque Cosmic es Innovation's Mind.

Mobile holder.
A useful addition to your
day-to-day life.

Soporte para teléfono móvil.
Muy útil en tu vida cotidiana.

Shower soap dish with built-in shower squeegee hidden in the base, ready to use. Can be taken apart for cleaning. Anodised aluminium shelf.

Jabonera que incorpora un limpia mamparas, oculto en la base y listo para su uso. Extraíble para una mejor limpieza. Estante de aluminio anodizado.

Wall-mounted brush-holder with translucent tumbler. Secure attachment to the wall. Easy to clean.

Porta cepillos de pared, incluye vaso translúcido. Fijación segura a la pared. Apto para la limpieza.

Soap level indicator. Dispenser button at the bottom. Anti-drip system. Large capacity (400 ml). Easy soap replacement system.

Indicador de nivel de jabón. Accionado por pulsador inferior. Sistema anti goteo. Gran capacidad (400 ml). Fácil reposición del jabón.

Double towel rail with fixed bars.
The bars can be opened up,
making it easy to hang towels.
Sturdy bracket.

Doble toallero con barras fijas.
La abertura entre ellas facilita la
colocación de las toallas.
Soporte de gran resistencia.

Ultrastrong fastening system!

Fixing disc (wall plate)

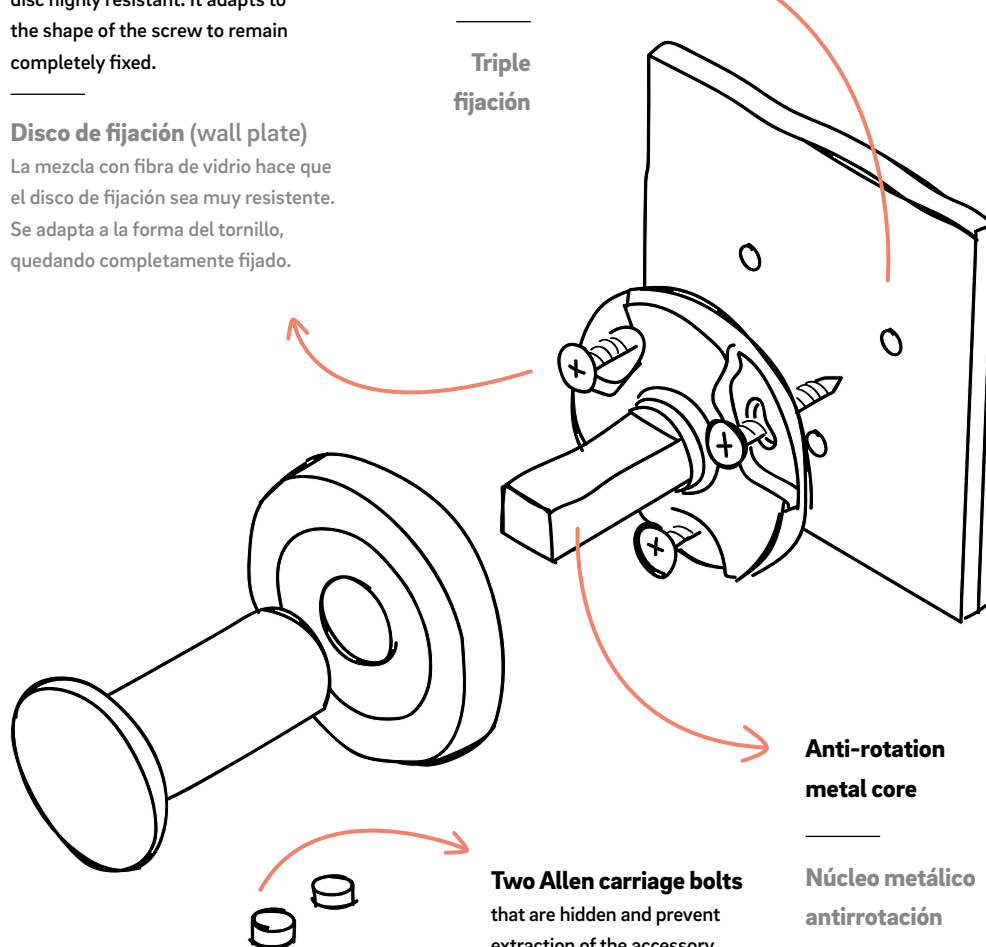

The fiberglass mix makes the fixing disc highly resistant. It adapts to the shape of the screw to remain completely fixed.

Disco de fijación (wall plate)

La mezcla con fibra de vidrio hace que el disco de fijación sea muy resistente. Se adapta a la forma del tornillo, quedando completamente fijado.

Triple fixing

Triple fijación

Anti-rotation metal core

Núcleo metálico antirrotación

Two Allen carriage bolts that are hidden and prevent extraction of the accessory.

Dos tornillos ciegos allen que quedan ocultos y privan la extracción del accesorio.

Fischer DuoPower

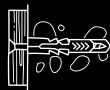

Fischer DuoPower wall plugs.

Strong and universal: anchoring with superior performance. This is the **first smart anchoring system** that decides whether to expand, fold or knit together depending on the wall's material.

Tacos Fischer DuoPower:

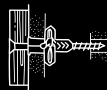

Fuerte y Universal: el anclaje con un rendimiento superior. Es el **primer anclaje inteligente** que decide si se expande, se pliega o se anuda según el material de la pared.

Cosmic takes a huge step forward by offering the 3 Chrome finish for the new Architect S+ accessories collection

Trivalent chrome plating has been developed as an alternative to hexavalent chrome, as it is less toxic during the production process. The company is turning its attention to the environment and offering a new, **more sustainable** finish that generates **less waste** and **saves energy**. This is a truly **eco-responsible** chrome finish.

The chrome plating process is the surface treatment applied to some materials in order to give them anti-corrosive properties, a greater shine and more strength. Chrome is the most popular finish in the bathroom accessories industry, so Cosmic is getting ahead of the pack by using **trivalent chrome** to launch a collection that cares for our planet.

Energy saving

Ahorro de energía

Reducing hazardous waste

Reducción de residuos peligrosos

3 Chrome

Eco responsible

Eco responsible

3 Chrome Empowering the future

3 Chrome Potenciando el futuro

Cosmic da un paso adelante y propone el acabado 3 Chrome para la nueva colección de accesorios Architect S+

Los baños de cromo trivalente se desarrollan como alternativa al cromo hexavalente por su menor toxicidad durante la producción. La firma toma consciencia ecológica ofreciendo un nuevo acabado **más sostenible**, ya que se **reducen los residuos** y se **ahorra energía en la fabricación**. En definitiva, hablamos de un acabado de cromo **Eco-responsible**.

El cromado es un proceso electroquímico de tratamiento de superficie que se aplica a algunos materiales con los objetivos de: proveer propiedades anticorrosivas, brillo, resistencia, entre otras. Este acabado está muy extendido en el sector de los accesorios para el baño con lo que **Cosmic** se adelanta y avanza con la aplicación de **Cromo Trivalente** para lanzar al mercado una colección más responsable con el planeta.

Cosmic has developed a new Soft Black finish for Architect S+ with an extra matte texture

This **innovative black coating** is the result of the application of a state-of-the-art process used in the **automobile industry** to **protect bodywork: electrophoresis**. The research and development carried out by the Cosmic team has led them to make progress in the world of **bathroom design**, by applying a process that has never before been used in this industry.

Apart from its aesthetic beauty, another advantage of the new **Soft Black** is its completely **uniform** finish, which makes

it **smooth, consistent** and **pleasant to the touch**. The special several-phase production process makes it highly resistant to scratches.

One by one, each piece in the **Architect S+** collection with the metallic black finish is subjected to this process, which is **less toxic** than the traditional painting process and achieves better results, with a uniform thickness all over the piece and no defects such as peeling, drips due to excess paint or accumulated paint at the ends of the piece.

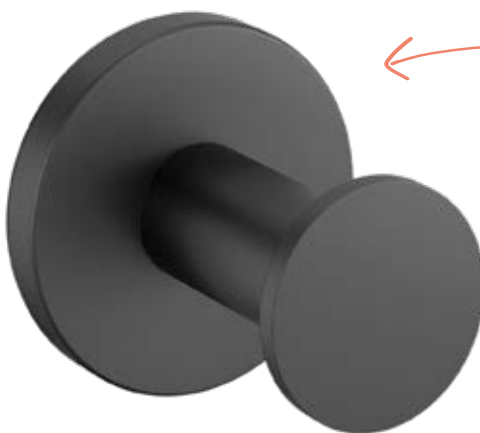

Uniform and compact black coating

Recubrimiento negro compacto y uniforme

Highly scratch resistant

Muy resistente a los rasguños

From automotive engineering to your bathroom
Desde la ingeniería automotriz hasta tu baño

Strong and long-lasting

Resistente y duradero

Soft Black

Cosmic ha desarrollado para Architect S+ un nuevo acabado Soft Black, que destaca por ser extra mate

Este **innovador revestimiento en negro** es el resultado de la aplicación de un proceso muy utilizado en el **sector automovilístico** para la **protección** de las **carrocerías: electroforesis**. La investigación y desarrollo realizada por el equipo de Cosmic ha hecho posible abrir camino en el **mundo del baño**, aplicando un proceso hasta ahora desconocido en este sector.

A parte del aporte estético, otro gran valor del nuevo **Soft Black** es su **uniformidad** en el acabado, consiguiendo una **textura suave, regular y agradable**

al tacto. El proceso de producción en diferentes fases da como resultado una **gran resistencia** a las **rayaduras**.

Una a una, cada pieza de la colección **Architect S+** con el acabado negro metálico se somete a este proceso, **menos tóxico** que el proceso de pintura tradicional y con mejores resultados ya que no se producen diferencias de espesor entre las diferentes partes de la pieza, evitando defectos como piel de naranja, gotas por exceso de cantidad o sobrecarga de pintura en puntas o extremos.

Materials

FLOAT GLASS (Flat shelves and washbasin tops)

Made using standard FLOAT type glass that has undergone no subsequent treatment other than the necessary machining, cutting and polishing. Therefore, it is a naturally fragile material and despite the fact that the most appropriate density has been used in every case, special care should be taken when using it. 100% recyclable.

MIRRORS

Sheet of glass covered by layers of silver, copper and, finally, paint. The use of topquality raw materials in conjunction with the correct mirror manufacturing process guarantee maximum protection against stains caused by corrosion.

PLASTIC

We use various technical plastics with different features to meet the manufacturing and aesthetic needs of each product. These include ABS (with or without chrome), PP, PA, PE, PC, PS, etc.

STAINLESS STEEL

It is an alloy of iron and carbon. Steel maintains the iron hardness characteristics. This steel has a special chrome treatment against the rust and oxidation. The used alloys are SS201 & SS304.

BRASS OR SIMILAR ALLOYS (glossy chrome and matt chrome)

A copper and zinc alloy—this is one of the non-ferrous metals, the proportion of which varies according to its use. It offers greater malleability than both copper and zinc separately, and it is easily refined which allows for a high level of design customization.

ALUMINUM

Aluminium alloy. May be presented as solid, extruded and calibrated. Aluminium is an important metal for numerous industries, such as the automotive industry where it is most common. It is generally a soft metal with low melting points.

CLEANING INSTRUCTIONS

Clean with a liquid domestic cleaner or with soap suds. Afterwards rinse with clear water and polish with a cloth. Do not use any cleaning agents containing acid or scouring agents. Damage caused by improper treatment is not subject to our guarantee.

Materiales

VIDRIO FLOAT (Estantes y encimeras)

Realizado con vidrio tipo FLOAT estándar sin ningún otro tratamiento posterior más que la mecanización, corte y pulido necesarios. Se trata, pues, de un material que por su propia naturaleza es frágil y a pesar de que en cada caso se ha utilizado el espesor más adecuado, debe tenerse un especial cuidado en su uso. 100% reciclable.

ESPEJOS

Plancha de vidrio sobre la que se aplica una capa de plata, cobre y finalmente pintura. El uso de materia prima de primera calidad, unido a un correcto proceso de fabricación de los espejos, aseguran la mayor protección contra las manchas por corrosión.

PLÁSTICO

Cosmic utiliza plásticos técnicos de distintas características en función de las necesidades de fabricación y estéticas de cada producto o pieza. Entre los plásticos utilizados están: ABS (cromado o no), PP, PA, PE, PC, PS, etc.

ACERO INOXIDABLE

Aleación de hierro con carbono que conserva las propiedades de dureza del hierro. Se trata de un acero con un tratamiento especial de cromo, contra la corrosión y oxidación. Las aleaciones utilizadas son la SS303 y SS304.

LATÓN O ALEACIONES ANÁLOGAS (cromo brillante y cromo mate)

Aleación de cobre y zinc, es uno de los metales no férricos, cuya proporción varía en función de su aplicación. Destaca su maleabilidad, más alta que la del cobre y zinc por separado, y fácil pulido lo cual permite un alto grado de adaptación en el diseño de las piezas.

ALUMINIO

Aleación de aluminio. Se puede presentar como macizo extrusionado, estirado y calibrado. El aluminio es un metal importante para una gran cantidad de industrias, como la del automóvil, donde se utiliza habitualmente. Tiende a ser blando y presenta puntos de fusión bajos.

INSTRUCCIONES DE LIMPIEZA

Las superficies pueden limpiarse con productos de limpieza líquidos o con agua jabonosa. (Tener en cuenta las instrucciones de uso del fabricante de detergentes). A continuación aclarar con abundante agua y pulir con una gamuza. No utilizar productos de limpieza que contengan ácidos, vinagre o que sean abrasivos. No nos responsabilizaremos si los desperfectos se producen a causa de un manejo inadecuado.
